

Mr. Mark Stilson, Regional State Engineer
Price, Utah

May 29, 2008

Subject: Protest of Application 91-5150 (F77918), located in Emery County.

Dear Mr. Stilson:

The Green River Canal Co. wishes to submit this protest and to request a hearing regarding this application. The reason for our protest is that the applicant, Mancos Resources, Inc., through its representative, Mr. Gregory Hunt, has indicated to the Green River Canal Co. directors in a meeting on this date that Mancos Resources is considering using the Green River canal itself as a source from which to pump the water they seek in this application.

Clearly, their using our canal as a delivery conduit needs to be carefully and completely defined for us to evaluate the impact of such a new use. A hearing is needed to explore the details of their proposal.

Sincerely,

Dean King, President,

Green River Canal Co.
